

## MICROBIT LIGHT SENSOR-

Step 1: in the forever loop put an if true then loop. Press the plume icon on the if true then block.

Step 2: drag an > reporter into the part where it says true.

Step 3: in the > block, add a light level Boolean in the first place, and in the other side type 20.

Step 4: In the top part where you can put blocks, add a show icon block and select a large icon from the dropdown menu.

Step 5: in the lower part of the dropdown menu, drop a clear screen block.

Step 6: click on the dropdown sign beside "download". Then click on the pair micro:bit button.

Step 7: Click download.
